INFOPROTECT 2009

CHALLENGING THE LATEST THREATS IN INFORMATION SECURITY MANAGEMENT

5 & 6 OCTOBER - BRUSSELS, BELGIUM

WHAT IS THE INFOPROTECT SUMMIT ABOUT?

InfoProtect 2009 is a business summit produced, organized and run by Endeavour Events. Endeavour Events specializes in the production of international business summits for senior executives from European Fortune 1,000 companies.

Our events are tailor-made and designed around the specific needs and requirements of the participants. Endeavour Events' business summit concept offers its clients a unique opportunity to enjoy a maximum level of interaction through pre-arranged meetings, networking, workshops, discussions and presentations whilst enjoying the 5-star hospitality in luxurious surroundings.

OBJECTIVE OF THE INFOPROTECT SUMMIT

The third instalment of the wildly successful and popular InfoProtect summit. InfoProtect 2009 will address the constantly adaptive and evolving threats that face every organisation. InfoProtect 2009 summit will identify the most innovative technologies in the market to combat deadly IT Security threats.

REASONS WHY THE INFOPROTECT SUMMIT WILL BE A SUCCESS:

- 1** Tailor made personalized itineraries, to reflect your specific needs and requirements. You are provided with a unique opportunity to review the profiles of all participants and presentations of all speakers 3 weeks prior to attending the event. Your personal schedule will feature only those presentations / workshops / meetings that you will be interested in.
- 2** Consult the industry's leading experts. The highly interactive sessions are limited to no more than 60 participants. It is an outstanding way to get today's most pertinent updates about corporate actions process.
- 3** Take your knowledge to the next level. Improve the performance of protecting Corporate Data by developing an efficient IT Security department and find the best technology solution in a rapidly changing environment and in the most challenging area of operations.
- 4** Get your questions answered in an interactive setting. In two intensive days, you will have plenty of opportunities to discuss your particular issues with specialists, during panels, workshops and individual meetings. You will dig deeper into the topics that are most relevant to your organization, and engage in discussions with your peers, both formal and informal.
- 5** Share your experiences. You will have the unique opportunity to leverage the collective experience of some of today's top IT Security professionals to address your IT Risk and Security Management practices and exchange experiences.

The attendees number is limited to 60 participants! Register today at www.endeavourenevents.com - upcoming events or call +31.207.88.41.50

INFOPROTECT 2009

CHALLENGING THE LATEST THREATS IN INFORMATION SECURITY MANAGEMENT

5 & 6 OCTOBER - BRUSSELS, BELGIUM

KEY NOTE SPEAKERS

Liam Lynch
Chief Security Strategist, Senior Director Information Security for eBay Inc.
Founding Member of the Cloud Security Alliance

Liam joined eBay in May of 2002, where he was Security Architect in the Architecture group. He served as Chief Security Architect for eBay marketplaces and consulted for marketplaces adjacencies. He created the security framework for the Java platform, Payment Gateway, Billing, and Customer Support systems.

In June 2007, he moved to Marketplaces Information Security to work for Dave Cullinane (CISO) to create programs for predictive security for the world's largest e-commerce platform.

Prior to joining eBay, he worked in Security Architecture at Sybase and in Security Architecture in Military, Government, Health Care, and Telecommunications industries.

Liam is also a founding member of the Cloud Security Alliance, a non-profit organization formed to promote the use of best practices for providing security assurance within Cloud Computing, and provide education on the uses of Cloud Computing to help secure all other forms of computing.

Julia Harris
Head of Information Security for the BBC - British Broadcasting Corporation
Council Member for the ISF - Information Security Forum

Julia has worked in the IT industry for around 30 years, working for various banks, credit card companies, telecom providers, media companies, and a big 4 consultancy. Now presiding over the risk mitigation world of the worlds most well known media organisation.

Skills started within the mainframe systems programming environment through networks and client server applications, culminating in a move to systems security. For well over 25 years she has been working within the Information Security Industry, from the early days of security administration, through the infancy of informationsecurity becoming a professional role, to today being Head of Information Security for the BBC.

Julia is currently an ISF council member for the UK. She sat on the committee of the British Computer Society (BCS) Information Security Specialist Group for many years. She has also sat on the Data Protection Expert Panel for the BCS.

INFOPROTECT 2009

CHALLENGING THE LATEST THREATS IN INFORMATION SECURITY MANAGEMENT
